**SUB-FUND SUITABILITY**

**WHO IS THE SUB-FUND SUITABLE FOR?**

The ILP sub-fund is only suitable for investors who:

- are looking to maximise total return through a combination of both income and capital growth;
- are looking for a diversified exposure to high yield income markets and are willing to accept the risks and volatility associated with investing in such markets; and
- have an investment horizon over the medium to long term.

Due to the higher than average degree of risk attached to investment in the Underlying Fund because of its ability to invest in high yield securities, an investment in the Underlying Fund should not constitute a substantial proportion of an investment portfolio and may not be appropriate for all investors.

Further Information

Refer to "Investment Objectives and Policies" of the Underlying Fund's Supplement for further information on sub-fund suitability.

In normal market conditions the Underlying Fund may invest up to 30% of its total net assets in high yield Fixed Income Instruments that are rated Caa or lower by Moody's or CCC or lower by S&amp;P or equivalently rated by Fitch (or, if unrated, determined by the Investment Advisor to be of comparable quality).</li> <li>• The Underlying Fund may invest without limit in USD-denominated securities of non-U.S. issuers. Bottom-up strategies examine the profiles of individual credits and are key to the Investment Advisor's ability to select undervalued securities.</li> <li>• The Underlying Fund may hold both non-USD denominated Fixed Income Instruments and non-USD denominated currency positions. Non-USD denominated Fixed Income Instruments positions are limited to 20% of total portfolio exposure and non-USD denominated currency exposure is limited to 20% of total assets.</li> <li>• The Underlying Fund may use derivative instruments such as futures, options and swap agreements and may also enter into currency forward contracts. Derivative instruments may be used for (i) hedging purposes and/or (ii) investment purposes and/or (iii) efficient portfolio management.</li> <li>• The Underlying Fund is considered to be actively managed in reference to the Index, which the Fund uses for duration measurement, calculating its global exposure (using relative VaR methodology) and performance comparison purposes. However, the Index is not used to define the portfolio composition of the Underlying Fund or as a performance target.</li> <li>• The Underlying Fund promotes environmental and social characteristics but does not have sustainable investment as its objective.</li> </ul>	<p>investment strategy.</p>
